

Kenneth Matovu

FullStack Software Engineer (JavaScript, Python and Django, React, NextJs, HTML, CSS) with **3+ years** of experience building web apps/software solutions/data pipelines in the fintech/ banking/ e-commerce/SaaS/consulting industries.

WORK EXPERIENCE

Sonador Motors Co.,Ltd (Automotive Industry). Web Developer.

Japan, Nagoya (Full Time [9hrs Weekdays])

09/2024 - Present

- **Developed** and deployed a comprehensive full-stack web application using Next.js and Django, facilitating efficient vehicle inventory management and streamlining customer inquiries and lead tracking.
- **Designed** and implemented robust RESTful APIs, optimizing data synchronization between frontend and backend systems to support a scalable application architecture.
- **Built** a bespoke invoice generation system that automated billing workflows, significantly reducing manual errors and enhancing overall operational efficiency.
- **Managed** comprehensive end-to-end IT operations, ensuring system reliability through proactive maintenance, expert troubleshooting, and continuous performance optimization.
- **Implemented** strategic SEO and digital marketing optimizations, driving increased website traffic and successfully generating high-quality sales leads.
- **Created** and managed professional social media presences across Instagram and Facebook, markedly improving brand visibility and deepening customer engagement.
- **Optimized** website performance and page load speed, resulting in a superior user experience and improved search engine rankings.
- **Applied** rigorous web security best practices, including secure authentication and thorough data validation to protect against common vulnerabilities.
- **Automated** internal workflows for managing customer inquiries and communications, which improved response times and boosted operational productivity.
- **Collaborated** effectively with cross-functional stakeholders to define requirements and deliver scalable, user-centric technical solutions.
- **Maintained** and updated production systems, ensuring high availability and data integrity while driving the continuous improvement of business applications.

Resi Staffing & Services (Child Care). FullStack Software Engineer.

**England, Cliftonville (Remote - Part time[2hrs Weekdays])
08/2024 - 12/2024**
